DETAILED ACTION

Allowable Subject Matter

1. Claims 6, 7, and 9 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With regard to claims 6, 7, and 9, the prior art discloses a method of x-ray diffraction, comprising the steps of: mounting the sample on a sample stage; directing x-rays through a double pinhole collimator onto the sample; diffracting the x-ray diffracted by the sample with an analyzer crystal onto a detector; rotating the sample and rotating the analyzer crystal and the detector about coaxial axes; and measuring the diffracted x-ray intensity as a function of angle of rotation of the sample and the angle of rotation of the analyzer crystal and detector. However, the prior art fails to teach or fairly suggest the steps of: rotating the analyzer crystal and detector to a predetermined position; rotating the sample whilst keeping the analyzer crystal and detector in the predetermined position and measuring the x-rays as a function of angle of sample rotation; and determining the sample rotation angle at which the measured x-rays are at a peak and rotating the sample to that angle, as claimed in claim 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
